Section 1 – Introduction

This directory provides a list of St. Luke's Health Plan's Medicare Advantage in-network providers.

Use this directory to find an in-network medical provider. Because all of St. Luke's Health Plan's are HMO plans, out-of-network providers are not covered, except in urgent or emergent situations. If the provider is not listed in this directory, that means they are out-of-network.

The network providers listed in this directory have agreed to provide you with your health services. You may go to any of our network providers listed in this directory. You are not required to obtain a referral from your PCP before seeing a specialist. Some specialists may require a referral before they will see you, but this is their own requirement, not a requirement of St. Luke's Health Plan. A prior authorization may be required for some services. Please see your Evidence of Coverage for more information. If you have been going to one in-network provider, you are not required to continue to go to that same provider. If an out-of-network provider submits a bill directly to you, please do not pay the bill. The out-of-network providers should submit the bill directly to St. Luke's Health Plan, not original Medicare, for processing. We will let you know if you are responsible for part of the costs, if any.

You may obtain emergency services from the closest available provider, and you may obtain urgently needed services from any qualified provider when out of the plan's service area or when network providers are unavailable.

You must use network providers except in emergency or urgent care situations or for out-of-area renal dialysis services. If you obtain routine care from out-of-network providers, neither Medicare nor St. Luke's Health Plan will be responsible for the costs.
